Interrogation of J. Neuland, Papal Prelate
by Captain O.M. Nordon.
(present Dr. I. Mueller)

Dr. Rascher, about 40 years old, physician and captain of the Air Corps was ordered, especially by Himmler, to carry out aerial- and freezing experiments on prisoners.

Walter Neff as witness manages, at present, the cardboard factory Schuster in Dachau, Schleissheimerstrasse.

Information: (N.)

One day an "Untersturmfuehrer" (Lieutenant of the SS) who for some time lived with us in the same bunker as a prisoner, came to see us in the special building. He was released later on. He told us that he met Rascher in the prison of the barracks of Neufreimann near Munich. Latter told him that he was afraid ~~to be~~ liquidated because Himmler would not allow him to discontinue those experiments. that is the experiment of tearing out legs, the experiments of aerial pressure etc. I asked him "What tearing out of legs?" I have not heard of those experiments "as yet". "Certainly," he declared, "There is a mechanism to tear out the leg. With these experiments they try out that Styptic."

Later on I asked Kohlenklaus if that was true, and he confirmed this statement. He said Rascher once told him: "This one or that one, once sentenced to death and used for that experiment, endured it and thereby remained alive."

According to K's information they never used for those experiments any persons sentenced to death, but prisoners only, at first Polish priests, later on German clergymen as well.

According to N's information Halder told him that Hitler was the bloodthirstiest man he had ever seen. According to Halder Himmler was ruined first by Heydrich then by Bormann and later on by Hitler.

Sepp Dietrich was present at the shootings in Plötsensee. Surely, he will remember various persons who were shot there, why these persons were killed etc.
